

Meridian Payroll 4.2 Release Notes

Owner: Product. Released September 30, 2026.

New

- **Earned wage access:** employees can withdraw up to 50% of wages they have already earned before payday, for a flat fee of \$2.99 per transfer. Employers enable it under Settings, then Benefits. It does not change the employer's payroll funding.
- **Instant final paychecks:** for terminated employees, employers can now pay the final paycheck to a debit card within 30 minutes, which helps meet same-day final-pay laws in states like California and Colorado.
- **Pay stub translations:** pay stubs are available in Spanish, Vietnamese and Simplified Chinese.

Improved

- The payroll approval page now shows the funding cutoff for the selected pay date and warns 2 hours before it passes.
- Tax-form downloads (W-2, 1099) are now available as one ZIP for the whole company.

Fixed

- Overtime for employees with two pay rates in the same week now uses the weighted-average regular rate, as required by the Fair Labor Standards Act.
- Garnishment orders with a start date in the middle of a pay period are now prorated correctly.
